

# Current setup

## Planned setup

I've bought an AIS650 and an AIS100 and plan to extend the network according to this scheme.

1. Will it work?
2. Will the E70196 (Raymarine STNG to NMEA0183 VHF Converter kit) work with my VHF Ray54E?
3. Will depth-data from ST40 be visible on the STNG network?
