dating the system's MFDs, but also for updating the systems other Raymarine accessories which are designed to be updated by the system's size of the downloaded compressed folder for a MFD running LightHouse II or LightHouse 3 software can be as large as 2.4GB (LightHouse 3 .iso files. Each of these .iso files is designed to update software within a specific family of Raymarine accessories. The instructions below detail Extract All feature to easily copy all of these files to the root level directory of a microSD memory card.

e update compressed folders for MFDs running LightHouse II and LightHouse 3 software include software update .iso files to not only update of many Raymarine accessories. The software updates for individual Raymarine products may also be accessed and downloaded via [Raymarine's Product Software Updates web page](#). Software update instructions may be accessed via the links found on each respective product's software update web page.
