

RAYMARINE 7" AND 10" MONITOR TEMPLATE

The sole purpose of this laser cut template is to simplify the installation of the Raytheon 7" and 10" monitor screens.

These 12 ga. Stainless Steel templates are designed in such a way that outside of the part is the actual size of the screen, thus it can be located exactly where the technician finds it to be most proficient and esthetically pleasing. Drilling the holes next to the template within .004 assures proper hole alignment at the final assembly. Once the template has been secured with screws, the inside of the template can be used as a guide to cut the required shape, filing to the template should assure the proper fit
